I don't understand all the positive reviews for this game. It's a very basic wave shoot... melee. You will hear over and over again this phrase "You have to swing it like a real sword!"

Basically, 180 degrees in front of you and above, little flying demons will come at you while throwing balls of fire\shadow\magic that hurt you. You are equipped with a shield and a sword. Supposedly you have these powers that you can build up and use.

Unfortunately, you will be bored to tears. It's just a seemingly endless wave after wave of this same basic enemy type that literally flies to you so you can melee them with your sword. They will stay in one spot for you after having flown around all around you throwing balls of dark magic. It will take multiple swipes to eliminate these creatures. Your arm will get tired. You will think to yourself, should I go on and keep playing to see if I can survive long enough to see something different (The store description says there's a boss)

In the end, if you're like me, you will decide that your time is better spent on other, more interesting games. This isn't fun. Even at the current Halloween sale price of \$1.79 I cannot give a positive recommendation. It's just too boring and I can't get past the sheer boredom and arm tiredness to press on to see if I can survive long enough to see something other than more of the same (the screenshots show a purple fat boss looking enemy).

Rate 4/10 Sale Price Rating ... would give 3/10 at normal price of \$6.99

note: I played this on the Oculus Rift with Touch Controllers and didn't notice any issues.. Love the art style, it looks fantastic. Overall a fun little game. It can be quite challenging too, made me sweat a little bit.. This is awesome. You HAVE to swing it like a real sword.. Really cool game. Amazing art but it gets you pretty winded, you have to move quite a bit in this game.. This is awesome. You HAVE to swing it like a real sword.. Love the art style, it looks fantastic.
